Sabunla - Deterjanla Yıkama

- Toz sabunla (kimyasal karışım içermeyen) 60°C sıcaklıkta yapılan yıkamalarda en iyi sonuç elde edilir. Toz sabun ılık suda eritilerek kullanılmalıdır. Nakış yapılmış ürünleri katlanmış veya sıkıştırılmış şekilde birarada tutmamak gerekir. İyi bir durulama yapmadan kurutmayınız, sıkımayınız. Ütülemeyi arkadan veya iki bez arasında yapınız.
- Enstitü Nakış İplikleri'nin renk haslığının yüksek oluşundan dolayı bununla işlenmiş ürünler 60°C sıcaklıkta normal deterjanla yıkanabilir. (Sadece beyazlatma (çamaşır suyu) veya optik parlaklık veren maddeler içermeyen deterjanlar kullanılabilir, bu maddeler içeren deterjanlar rengi bozabilir.)

Depolama

Nakış ipliklerini uzun süre direkt güneş ışığında ve yüksek sıcaklıkta depolamayınız.

Ekolojik şartlar doğrultusunda zaman zaman boyalarımızı iyileştirmek zorunda kalmaktayız. Bu sebeple kazan farklılıklarına dikkat edilmesi gerekmektedir.

Not: Ürün renklerimizle broşürdeki renkler arasında matbaa baskısından kaynaklanan ton farklılıkları oluşabilir.
